---

# CAUTIONS

---

Before using the transceiver, read all instructions carefully and completely.

**SAVE THESE INSTRUCTIONS** – This instruction manual contains important safety and operating instructions for the IC-3210A/E.

**NEVER** connect the transceiver to an AC outlet. This will ruin the transceiver.

**NEVER** connect more than 16 V DC power supplies or batteries to the transceiver. Check the source before connecting the power cable.

**NEVER** allow children to touch the transceiver during operation.

**NEVER** use or place the transceiver in areas with temperatures below  $-10^{\circ}\text{C}$  ( $+14^{\circ}\text{F}$ ) or over  $+60^{\circ}\text{C}$  ( $+150^{\circ}\text{F}$ ).

**NEVER** expose the transceiver to rain, snow or any liquids.

**DO NOT** place the transceiver in excessively humid environments.

**AVOID** placing the transceiver in direct sunlight, such as on the dashboard.

**AVOID** using the transceiver in excessively dusty environments.

**BE CAREFUL!** The heatsink may become hot when operating the transceiver continuously for long periods.

# FOREWORD

Thank you for purchasing the **IC-3210A/E DUAL BAND FM TRANSCEIVER** from Icom.

Please read this instruction manual thoroughly before operating your new **IC-3210A/E**. For further information, please feel free to contact your nearest Icom Dealer or Service Center.

# UNPACKING

Accessories included	Qty.
① DC power cable . . . . .	1
② Mobile mounting bracket . . . . .	1
③ Mounting support bracket . . . . .	1
④ Angle bracket . . . . .	1
⑤ Microphone* . . . . .	1
⑥ Mounting bracket screws . . . . .	4
⑦ Mounting screws (M5 x 12) . . . . .	4
⑧ Spring washers (M5) . . . . .	4
⑨ Flat washers (M5) . . . . .	4
⑩ Mounting self-tapping screws . . . . .	4
⑪ Nuts (M5) . . . . .	4
⑫ Screws (M3 x 6) . . . . .	2
⑬ Cable lugs . . . . .	2
⑭ External speaker plug . . . . .	1
⑮ Fuses (15A) . . . . .	2
⑯ Microphone hanger . . . . .	1

\* HM-12 (supplied with IC-3210A, Australia version)  
 HM-14 (supplied with IC-3210A, U.S.A. version)  
 HM-15 (supplied with IC-3210E)

## **TWO BANDS IN A COMPACT BODY**

The IC-3210A/E gives you 2 m and 70 cm in one compact body. Operate two bands with one transceiver. The built-in duplexer allows one-antenna operation.

## **FULL DUPLEX CAPABILITY**

Transmit on one band and receive on the other and you're operating with full duplex. Working full duplex is as easy as talking on the telephone.

## **SIMPLE PANEL DESIGN**

The front panel is very simple: there are only three controls and eleven switches. The simple design makes operation easy — even when driving.

## **20 DOUBLE-SPACED MEMORY CHANNELS**

The IC-3210A/E has 20 double-spaced memory channels. One space stores an operating frequency as well as all information required to work a repeater. When not working a repeater, the other space stores a frequency to be used for full duplex. Up to 40 channels can be used for simplex.

## **THREE SCANS**

The IC-3210A/E has three scans: programmed scan, memory scan and selected band memory scan. Using the memory channel skip function, any number of memory channels can be skipped during a scan.

## **PRIORITY WATCH**

Every five seconds, priority watch monitors another band VFO, a call channel, a memory channel, or all memory channels in succession while you work on the operating frequency.

## **POCKET BEEP**

When the UT-40 (sold separately) is installed, the transceiver functions as a pager. When a received tone frequency equals the tone you've set, an alarm of 30 seconds is emitted over the speaker. This is especially convenient for busy schedules, etc.

## **MONITOR FUNCTION**

The monitor function opens the squelch (also the tone squelch when the UT-40 is installed) without you rotating the [SQL/MONITOR] control.

# 2 PANEL DESCRIPTION

## 2-1 FRONT PANEL

- TRANSMIT INDICATOR [TX]**  
Lighted when transmitting. (p. 13)
- RECEIVE INDICATOR [RX]**  
Lighted when the squelch is open. (p. 12)
- TUNING CONTROL**  
Changes the operating frequency (p. 11), the memory channel (p. 18) and the contents of the SET mode displays (p. 10).
- LOCK SWITCH [LOCK]**  
Deactivates the tuning control and locks some switches. (p. 27)
- VFO/MEMORY SWITCH [VFO/M]**  
Accesses the VFO or the memory mode. (p. 18)
- CALL CHANNEL SWITCH [CALL]**  
Accesses and leaves the call channel. (p. 17)
- BAND SELECTOR SWITCH [BAND]**  
Selects either VHF or UHF. (p. 11)
- TUNING STEP SWITCH [TS]**  
Sets the tuning step at 1 MHz. (p. 11)
- PRIORITY WATCH [PRIO]**  
Turns priority watch ON and OFF. (p. 25)
- TRANSMIT POWER SWITCH [HI/LO]**  
Sets the transmit power to 5 W or 25 W. (p. 13)
