

## INSTRUCTION MANUAL

# VHF MARINE TRANSCEIVER **IC-M411**

Icom Inc.

---

## FOREWORD

---

Thank you for purchasing this Icom product. The IC-M411 VHF MARINE TRANSCEIVER is designed and built with Icom's state of the art technology and craftsmanship. With proper care, this transceiver should provide you with years of trouble-free operation.

We want to take a couple of moments of your time to thank you for making the IC-M411 your radio of choice, and hope you agree with Icom's philosophy of "technology first." Many hours of research and development went into the design of your IC-M411.

### ◆ **FEATURES**

- *Advanced receiver performance*
- *Easy to hear speaker*
- *Built-in DSC meets Class D requirement*
- *Rugged waterproof construction*
- *Favorite channel function*
- *AquaQuake water draining function*

Icom, Icom Inc. and the ICOM logo are registered trademarks of Icom Incorporated (Japan) in the United States, the United Kingdom, Germany, France, Spain, Russia and/or other countries.

---

## IMPORTANT

---

**READ ALL INSTRUCTIONS** carefully and completely before using the transceiver.

**SAVE THIS INSTRUCTION MANUAL** — This instruction manual contains important operating instructions for the IC-M411.

---

## EXPLICIT DEFINITIONS

---

WORD	DEFINITION
 <b>WARNING!</b>	Personal injury, fire hazard or electric shock may occur.
<b>CAUTION</b>	Equipment damage may occur.
<b>NOTE</b>	Recommended for optimum use. No risk of personal injury, fire or electric shock.

**CLEAN THE TRANSCEIVER AND MICROPHONE THOROUGHLY WITH FRESH WATER** after exposure to water including salt water, otherwise, the keys and switches may become inoperable due to salt crystallization.

---

## IN CASE OF EMERGENCY

---

If your vessel requires assistance, contact other vessels and the Coast Guard by sending a Distress call on Channel 16.

### **USING CHANNEL 16**

#### **DISTRESS CALL PROCEDURE**

1. "MAYDAY MAYDAY MAYDAY"
2. "THIS IS ....." (name of vessel)
3. Your call sign or other indication of the vessel (AND 9-digit DSC ID if you have one).
4. "LOCATED AT ....." (your position)
5. The nature of the distress and assistance required.
6. Any other information which might facilitate the rescue.

Or, transmit your Distress call using digital selective calling on Channel 70.

### **USING DIGITAL SELECTIVE CALLING (Ch 70)**

#### **DISTRESS CALL PROCEDURE**

1. While lifting up the key cover, push and hold **[DISTRESS]** for 5 sec. until you hear 5 short beeps change to one long beep.
2. Wait for an acknowledgment on Channel 70 from a coast station.
  - After the acknowledgement is received, Channel 16 is automatically selected.
3. Push and hold **[PTT]**, then transmit the appropriate information as listed above.

---

## INSTALLATION NOTE

---

The installation of this equipment should be made in such a manner as to respect the EC recommended electromagnetic field exposure limits (1999/519/EC).

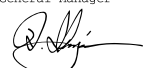

The maximum RF power available from this device is 25 watts. The antenna should be installed as high as possible for maximum efficiency and that this installation height should be at least 5 meters above ground (or accessible) level. In the case where an antenna cannot be installed at a reasonable height, then the transmitter should neither be continuously operated for long periods if any person is within 5 meters of the antenna, nor operated at all if any person is touching the antenna.

In all cases any possible risk depends on the transmitter being activated for long periods. (Actual recommendation limits are specified as an average of 6 minutes) Normally the transmitter is not active for long periods of time. Some radio licenses will require that a timer circuit automatically cuts the transmitter after 1–2 minutes etc.

Similarly some types of transmitter, SSB, CW, AM, etc. have a lower 'average' output power and the perceived risk is even lower.

# DOC

**CE** CE versions of the IC-M411 which display the “CE” symbol on the serial number seal, comply with the essential requirements of the European Radio and Telecommunication Terminal Directive 1999/5/EC. This warning symbol indicates that this equipment operates in non-harmonised frequency bands and/or may be subject to licensing conditions in the country of use. Be sure to check that you have the correct version of this radio or the correct programming of this radio, to comply with national licensing requirement.

## PRECAUTIONS

---

**⚠ WARNING! NEVER** connect the transceiver to an AC outlet. This may pose a fire hazard or result in an electric shock.

**NEVER** connect the transceiver to a power source of more than 16 V DC or use reverse polarity. This will ruin the transceiver.

**NEVER** cut the DC power cable between the DC plug at the back of the transceiver and fuse holder. If an incorrect connection is made after cutting, the transceiver may be damaged.

**NEVER** place the transceiver where normal operation of the vessel may be hindered or where it could cause bodily injury.

**KEEP** the transceiver at least 1 m away from the ship's navigation compass.

**DO NOT** use or place the transceiver in areas with temperatures below  $-20^{\circ}\text{C}$  or above  $+60^{\circ}\text{C}$  or, in areas subject to direct sunlight, such as the dashboard.

**AVOID** the use of chemical agents such as benzine or alcohol when cleaning, as they may damage the transceiver surfaces. If the transceiver becomes dusty or dirty, wipe it clean with a soft, dry cloth.

**BE CAREFUL!** The transceiver rear panel will become hot when operating continuously for long periods. Place the transceiver in a secure place to avoid inadvertent use by children.

**BE CAREFUL!** The transceiver employs waterproof construction, which corresponds to IPX7 of the international standard IEC 60529 (2001). However, once the transceiver has been dropped, waterproofing cannot be guaranteed due to the fact that the case may be cracked, or the waterproof seal damaged, etc.

Icom optional equipment is designed for optimal performance when used with this transceiver. We are not responsible for the transceiver being damaged or any accident caused when using non-Icom optional equipment.

## ◇ PRIORITIES

- Read all rules and regulations pertaining to priorities and keep an up-to-date copy handy. Safety and Distress calls take priority over all others.
- You must monitor Channel 16 when you are not operating on another channel.
- False or fraudulent distress signals are prohibited and punishable by law.

## ◇ PRIVACY

- Information overheard but not intended for you cannot lawfully be used in any way.
- Indecent or profane language is prohibited.

## ◇ RADIO LICENSES

### (1) SHIP STATION LICENSE

You must have a current radio station license before using the transceiver. It is unlawful to operate a ship station which is not licensed.

Inquire through your dealer or the appropriate government agency for a Ship-Radiotelephone license application. This government-issued license states the call sign which is your craft's identification for radio purposes.

### (2) OPERATOR'S LICENSE

A Restricted Radiotelephone Operator Permit is the license most often held by small vessel radio operators when a radio is not required for safety purposes.

The Restricted Radiotelephone Operator Permit must be posted or kept with the operator. Only a licensed radio operator may operate a transceiver.

However, non-licensed individuals may talk over a transceiver if a licensed operator starts, supervises, ends the call and makes the necessary log entries.

Keep a copy of the current government rules and regulations handy.

## ■ Front panel

### 1 POWER/VOLUME CONTROL [VOL]

- ➔ Rotate to turn the transceiver power ON or OFF.
- ➔ Rotate to adjust the audio level.

### 2 SQUELCH CONTROL [SQL] (p. 7)

Rotate to set the squelch threshold level.

### 3 DISTRESS KEY [DISTRESS] (p. 18)

Push and hold for 3 sec. to transmit a distress call.

### 4 ENTER KEY [ENT]

Sets the DSC menu, a channel comment, etc. when pushed.

### 5 CLEAR KEY [CLR]

Push to cancel the entered function and exits the condition when pushed.

### 6 SCAN/TAG CHANNEL KEY [SCAN•TAG] (p. 11)

- ➔ Push to start and stop the normal or priority scan when tag channels are programmed.
- ➔ Push and hold for 1 sec. to set or clear the displayed channel as a tag (scanned) channel.
- ➔ While pushing [HI/LO] located on the microphone, push and hold for 3 sec. to set or clear all tag channels in the selected channel group.

### 7 CHANNEL UP/DOWN KEYS [▲]/[▼]•[GRP]

- ➔ Push to select the operating channels, Set mode settings, DSC menu items, etc. (pgs. 5, 6, 13, 41)
- ➔ Push both keys to select a channel group in sequence. (p. 6)
  - EUR version has International channels only and this function is not available.
- ➔ Push to select the desired digit or character. (pgs. 8, 13, 14, 17)
- ➔ While pushing [SCAN•TAG], push to adjust the brightness of the LCD and key backlight. (p. 9)
- ➔ While pushing and holding both keys, turn power ON to activates the AquaQuake function. (p. 9)

**8 CHANNEL 16/CALL CHANNEL KEY [16•C]**

- ➡ Push to select Channel 16. (p. 5)
- ➡ Push and hold for 1 sec. to select call channel. (p. 5)
  - “CALL” appears when call channel is selected.
- ➡ Push and hold for 3 sec. to enter the call channel programming condition when the call channel is selected. (p. 8)
- ➡ While pushing [CH•DUAL], push to enter the channel comment programming condition. (p. 8)
- ➡ While turning power ON, push to enter set mode. (p. 41)

**9 CHANNEL/DUALWATCH/TRI-WATCH KEY [CH•DUAL]**

- ➡ Push to select the regular channel. (pgs. 5, 6)
- ➡ Push and hold for 1 sec. to start dualwatch or tri-watch. (p. 12)
- ➡ Push to stop dualwatch or tri-watch when either is activated. (p. 12)

**10 DSC MENU KEY [MENU] (p. 13)**

Push to toggle the DSC menu ON or OFF.

## ■ Microphone

**1 PTT SWITCH [PTT]**

Push and hold to transmit; release to receive. (p. 7)

**2 CHANNEL UP/DOWN KEYS [▲]/[▼]**

- ➡ Push to select the operating channels, Set mode settings, DSC menu items, etc. (pgs. 5, 6, 13, 41)
- ➡ Checks TAG channels, changes scanning direction or resumes the scan manually during scan. (p. 11)
- ➡ Push to select the desired digit or character. (pgs. 8, 13, 14, 17)

**3 TRANSMIT POWER KEY [HI/LO]**

- ➡ Push to toggle the output power high and low. (p. 7)
  - Some channels are set to low power only.
- ➡ While pushing and holding [HI/LO], turn power ON to toggle the Microphone Lock function ON and OFF. (p. 9)

## 2 PANEL DESCRIPTION

### ■ Function display

#### 1 CHANNEL COMMENT INDICATOR

- 'Latitude,' 'Longitude' and UTC time data scroll in sequence.
- Channel comment appears and scrolls (if programmed) for about 10 sec. after the channel selection. (p. 8)
- "DSC" appears when DSC channel group is in use; "ATIS" appears when ATIS channel group is in use. (p. 6)
- "SCAN 16" appears during Priority scan; "SCAN" appears during Normal scan. (p. 11)
- "DW 16" appears during Dualwatch; "TW 16" appears during Tri-watch. (p. 12)
- In Set mode, indicates and scrolls the selected item. (p. 41)

#### 2 TAG CHANNEL INDICATOR (p. 11)

Appears when a TAG channel is selected.

#### 3 DUPLEX INDICATOR (p. 6)

Appears when a duplex channel is selected.

#### 4 LOW BATTERY INDICATOR

Appears when the battery voltage drops to approx. 10 V DC or below.

#### 5 DSC INDICATOR

Indicates the DSC status.

- "DSC" appears when a DSC call is received. (pgs. 23, 34)
- "POS REPLY" appears when a Position Reply call is received. (p. 37)

#### 6 GPS INDICATOR

- Appears while valid position data is received.
- Blinks when invalid position data is received.
- Disappears when no GPS receiver is connected.

#### 7 CHANNEL NUMBER READOUT

- Indicates the selected operating channel number.
  - "A" appears when a simplex channel is selected.
- In Set mode, indicates the selected condition. (p. 41)

#### 8 LOW POWER INDICATOR (p. 7)

Appears when low power is selected.

#### 9 CHANNEL GROUP INDICATOR (p. 6)

Indicates whether an International "INT" or U.S.A. "USA" channel is in use. (Depends on version)

#### 10 CALL CHANNEL INDICATOR (p. 5)

Appears when the call channel is selected.

#### 11 BUSY INDICATOR (p. 7)

Appears when receiving a signal or when the squelch opens.

#### 12 TRANSMIT INDICATOR (p. 7)

Appears while transmitting.
